

Freon refrigerants are one of the top choices due to their performance, reliability, and safety in air conditioning and refrigeration applications. In addition, Freon refrigerants are perfect for mobile air conditioning systems in vehicles of all sizes, including electric.

BENEFITS

- Non-ozone depleting
- Low toxicity, nonflammable refrigerant
- Made and packaged in the USA
- Global standard for mobile air conditioning

30lb: Part # RFRG6330

12oz: Part # RFRG6312

Opteon™ YF refrigerant has a significantly lower global warming potential than other refrigerants and meets global regulations for GWP standards. Additionally, it is comparable in thermodynamics and energy efficiency and capacity to HFC-134a.

BENEFITS

- Non-ozone depleting hydrofluoroolefin (HFO)
- Low GWP refrigerant
- Performance & operating characteristics similar to R-134a
- Cooling capacity & energy efficiency similar to R-134a
- Thermally stable under extreme use conditions encountered in MAC system

10lb: Part # CHEMR1234YF

12oz: Part # CHEMD15439101
